

# NOCELL®

Driving **DISTRACTION...** to the **CURB.**

## New Feature Roll Out: Continuing to Drive Safety Vehicle and Alert Visibility

Your ability to easily use the NOCELL® Platform to uphold your company's cell phone policy drives NoCell Technologies to continuously invest resources into developing new features.

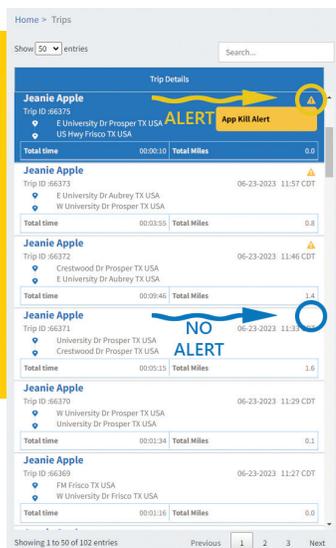

To help you clearly identify vehicle and alert information, NOCELL has added two new features.

### NEW! VEHICLE VISIBILITY

The NOCELL® Platform's new Vehicle Visibility pop-up provides you with a convenient way to quickly tie the driver to the vehicle he/she is operating, a feature especially helpful for pooled fleets. Now, rather than click through the driver's profile to determine the vehicle in operation, you have quick access to this information from the "Trips" screen.

By hovering over the driver's name, you will now see:

- The Driver Group
- Vehicle Model
- VIN
- Vehicle Make
- Vehicle Year
- NOCELLtag™

### NEW! ALERT VISIBILITY

The NOCELL® Platform's new Alert Visibility pop-up provides you with instant violation awareness. Now, you can quickly see which drivers have alerts and focus directly on those rather than needing to search for violations.

By hovering over the alert, you will see all activity that violates your company's cell phone policy.

PROTECT YOUR TEAM MEMBERS, COMPANY, AND THE PUBLIC
