FOR IMMEDIATE RELEASE

**NoCell Technologies and Christenson Transportation
Join Forces to Help End Distracted Driving**

[Aliso Viejo, Calif., August 9, 2023] — NoCell Technologies, a company that develops solutions to mitigate the use of cell phones while behind the wheel of commercial vehicles, and the Christenson Transportation, Inc., announced today they have joined forces to help reduce distracted driving. Christenson Transportation Inc, founded in 1995, is located in both Springfield, Missouri and Ethridge, Tennessee and operates in all forty-eight states. The trucking company specializes in hauling high-value, high-risk, and time-sensitive freight including tires, pet food, paper, electronics, and other general commodities. The trucking company will include the NOCELL® Platform – a commercial-grade solution that limits smartphone interaction while the vehicle is in motion – on professional drivers’ cell phones to help ensure the safe transportation goods throughout the country.

“We are honored to have Christenson Transportation join the NoCell family to help create safer roadways,” said Sam Inman, NoCell Technologies CEO. “Christenson’s decision to install the NOCELL® Platform illustrates their commitment to safety and to protecting their drivers and the public.”

“We had a hard time finding a service that met all our needs when it comes to eliminating distracted driving,” said Samuel Barnes, Christenson Transportation, Inc. Safety Supervisor. “But after hearing about NoCell, we found exactly what we needed to make sure our drivers have all the tools they need to stay free of distractions. Thanks to NoCell, we can say that we have made the roads safer.”

The NoCell® Platform will be installed on Christenson Transportation driver cell phones beginning immediately.

About NoCell Technologies

NoCell Technologies is making roadways safer with the NOCELL® Platform – a commercial-grade solution that limits smartphone interaction while a vehicle is in motion. NOCELL’s fully customizable, turn-key application allows fleet managers to authorize applications they deem safe and necessary for productivity while providing employee privacy. The safety-proven driver management platform supports fleets’ efforts to proactively limit unsafe driving behaviors, track compliance, and reduce risk, liability, and loss.
